

Assignment - 2.

[Part - A]

Q1] Define the bipartite graph?

\Rightarrow A bipartite graph is a graph in which the vertices are divided into two disjoint sets, such that no two vertices within the same set are adjacent. It is called bipartite graph?

Q2] How many edges are there in a graph with 7 vertices each of degree 4?

\Rightarrow Total no. of edges = (No. of vertices) \times (Degree of each vertex)

$$\Rightarrow \frac{7 \times 4}{2} = 14$$

Q3] Write an ex. of comp. bipartite graph?

We can draw above graph in any way.

Date: / /

(4) Define tree and forest?

Tree - In graph theory, a tree is an undirected connected graph. In other words, a conn. graph that does not contain even a single cycle is called a tree. A tree with n vertices has $(n-1)$ edges.

Forest - In graph theory, A forest is an undirected, disconnected, acyclic graph.

Date: _/ _/ _

[5] Find the centre of the following tree?

Remove all vertices of tree and also remove their edges, we get foll. tree.

Again remove all vertices of deg. 1 and also remove their edges we get

(Part-B)

[6] Which of the following are bipartite graph?

[2] Prove that if $G = (V, E)$ is a graph with e no. of edges then $\sum_{v \in V} \deg(v) = 2e$.

Proof: \rightarrow Since the degree of a vertex is the no. of edges incident with that vertex. The sum of degree counts the total no. of times an edge is incident with a vertex. Since every edge is incident with exactly two vertices, each

edge gets counted twice, once at each end. Thus the sum of the degree of the vertices of G is equal to twice the no. of edges or even.

[3] Prove that the comp. graph K_5 on five vertices is non-planar.

\Rightarrow The comp. graph K_5 contain 5 vertices and 10 edges. Now for conn. planar graph :- $3V - e \geq 6$.

$$3V - e \geq 6 \quad \text{where } V = 5 \text{ vertices}$$

$$3(5) - 10 \geq 6 \quad \text{where } e = 10 \text{ edges}$$

It does not satisfy the planar graph because it must be greater than or equal to 6. Thus K_5 is a non-planar graph.

(Part-C)

Q1. Find the shortest path.

(a) From

Date: / /

a	b	c	d	e	f	g
0	∞	∞	∞	∞	∞	∞
0	7	1	8	8	8	8
0	7	1	8	8	8	8
0	4	1	8	5	4	8
0	4	3	14	5	5	11
0	5	3	14	5	5	11
0	5	3	12	5	5	11
0	5	3	12	5	5	11
0	5	1	12	5	5	7
0	4	1	12	5	4	7

shortest path = a c e g = 7.

(1) from a to f.

a	b	c	d	e	f
0	∞	∞	∞	∞	∞
0	4	2	∞	∞	∞
0	3	3	10	12	∞
0	3	2	8	12	∞
0	3	2	8	10	14
0	3	2	8	7	13

Date: / /

(2) Find the following

(a)

Adjacency matrix.

 \Rightarrow

	V_1	V_2	V_3	V_4	V_5	V_6
V_1	0	1	1	0	0	0
V_2	1	0	1	0	1	1
V_3	1	1	0	1	0	0
V_4	0	0	1	0	1	0
V_5	0	1	0	1	0	1
V_6	0	1	0	0	1	0

(b) Incidence matrix:-

Date: / /

	e_1	e_2	e_3	e_4	e_5	e_6
V_1	1	1	0	0	0	0
V_2	0	0	1	1	0	1
V_3	0	0	0	0	1	1
V_4	1	0	1	0	0	0
V_5	0	1	0	1	1	0

~~18~~

[3] Find the minimal spanning tree of the foll. graph.

- Minimal spanning of the following graph using PRIM's algo.

Step 1 :-

Step 2 :-

Date: / /

Step-3:-

Step-4:-

Step-5:-

weight = 25

(b)

Step-1:-
